The 4th Philippine Solid & Hazardous Waste Management Conference in conjunction with the 1st International Conference on Circular Economy-based Waste Management (PSHWM|CE-WM 2019) aims to encourage regional and international communication, collaboration and networking to advance knowledge and promote values, attitudes, commitment, and skills needed to address emerging issues on waste management and protection of the environment. It also hopes to strengthen the link between collaborative projects and applied researches to support and address the industry needs.

Specifically, to bring together LGUs, Researchers, Scientists, Academe, Professionals, industry, NGOs, and civil society to disseminate research results, new ideas, and practical experiences in waste management, as well as, facilitate an open and constructive dialogue between multi-sector stakeholders towards resolving waste problems.

PSHWM | CE-WM 2019 focuses mainly on recent solid and hazardous waste management technologies, on-going projects and innovative solutions particularly on valorization prospects, and products from wastes such as biofuels, composts, waste-to-energy, among others.

Why collaborate with the 1st International Conference on Circular Economy-based Waste Management?

Managing waste properly requires multi-disciplinary approaches and remains a challenge for developing countries and cities.

A circular economy framework has been identified as a key to effective waste management requiring collaborative efforts in all sectors of the society. The Agenda 2030 supports this framework because of its regenerative design in eliminating wastes while conserving resources and reducing environmental pollution.

Waste management spans multiple areas, from responsible resource consumption to environmental sustainability. The collaboration of scientific communities, industry, regulators, and other stakeholders in the 1st International Conference on Circular-Economy-based Waste Management is highly relevant to meet the 2030 United Nations Sustainable Development Goals, and the Philippines, being the host country, its Development Goals: *AmBisyon Natin* 2040.
